

## How to Connect to Coeur d'Alene Tribe ArcServer Servers via ArcCatalog

- 1) Start by opening ArcCatalog

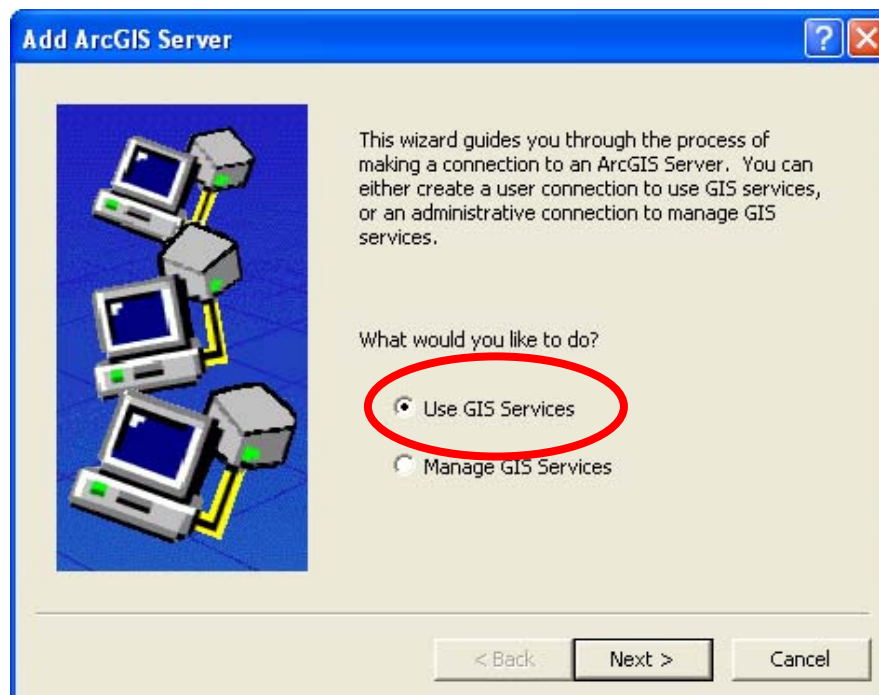

- 2) Then navigate in the table of contents to -> GIS servers.

Proceed to click Add “ArcGIS Server” option

- 3) This will bring up the following dialog box

Select “Use GIS Services” and then select “Next”

- 4) Type <https://gis.cdatribe-nsn.gov/ArcGIS/services> into the “Server URL” in the first blank and select finish

General

Choose the type of ArcGIS Server connection

☒ Internet

Server URL:

☐ Local

Host Name:

Authentication (Optional)

User Name:

Password:

☒ Save Username/Password

< Back Finish Cancel

You now have access to the following ArcServer services:

ArcServer Service	Description
aerialphotos	This data set contains imagery from the National Agricultural Imagery Program (NAIP). NAIP acquires digital ortho imagery during the agricultural growing seasons in the continental U.S.
BroadbandArcServer	This data set contains the locations of Red Spectrum broadband towers and the areas which have reception from those towers.
Encroachment3	This data set is an inventory of docks within Tribal Water.
Mobile Test	Dataset for testing purposes

NativeNamesFlash	This data set shows the locations of all indigenous named locations within the Native Names Project.
Pictometry	This data set is 1 foot resolution aerial orthoimagery of the Coeur d'Alene Reservation area and lower St. Joe River. Data was flown September and October of 2007.
RoadStatus	This service shows whether particular roads have been plowed and are open.
TestEditService	Dataset for testing purposes
TrailOfTheCoeurdAlenes	This service is a map of the Trail of the Coeur d'Alenes. The map shows the trail as well points of interest along it.
